EasyPizzaOvens.Com

Dear Customer,

Thank you so much for buying Easy Pizza Oven. We hope you enjoy your and your family's life with delicious pizza made at home.

Usage Instructions:

- Before placing the Easy Pizza Oven on the stove, you must have oven gloves or a thick cloth so that you can open/close the hot oven and put the pizza in and out.
- Place the Easy Pizza Oven on a gas stove and let it heat for 15 to 20 minutes on high flame for the first time. For the first time, the smell will come out and it will disappear automatically in a short while.
- Later on preheat the oven to high flame for just 10 minutes. Then turn the flame to medium and place the pizza inside. Be careful not to touch any part of the hot oven. You can check the pizza after 3 minutes and also turn around the pizza pan once.
- The pizza will be ready in 4 or 5 minutes on medium flame/heat. And you take it out and check it out. If not fully baked, place in the oven for another minute.
- Once you make a pizza twice or more, you'll have an idea. How much flame to keep and how long it takes to make your pizza. If the heat is high, reduce it. And if less, do more. Also, estimate the time. But don't go further than 5 or 7 minutes.
- To clean the oven, clean it only with a dry cloth, scrape if anything freezes, or heat it on the stove after cleaning with a damp cloth so that it dries quickly. And always keep it in a dry place. Avoid washing with water.

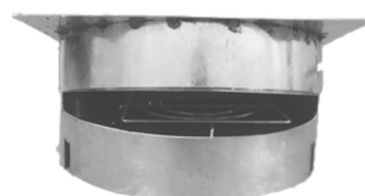

If you have a question/problem with usage, you can watch videos on our website for guidance, call us and WhatsApp. Or visit our YouTube channel and Facebook page. Where you will find easy and good pizza recipes as well. Make a note of our number and website in mobile so that it can be used in future.

Regards,

General Manager
